## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: the cross-reference to related applications is not updated. Appropriate correction is required.
2. Claim 30 is objected to because of the following informalities: the missing of the term --and-- between the phrases "for inducing electrical discharge" and "generating negative ions". Appropriate correction is required.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 22-30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-8, 40 and 41 of U.S. Patent No. 6,843,969 B1 in view of EP 278653. The patent claims recite an air cleaning device comprises all the structures as claimed except for the provision of an illuminator socket as claimed in claim 22 or the provision of detachable illuminator as claimed in claim 30. EP '653, a reference cited by Applicant, teaches in an air cleaner the limitation (see the reference character 18 in the Figure and col. 2, lines 25-30). The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the patent claims as shown by EP '653 because this would result in holding the illuminator and in servicing the illuminator.
